STEPHANIE OMONDIALE

7573645020 | stephomo757@gmail.com | Hampton, VA

SUMMARY

Programmer with hands-on experience developing AI and machine learning solutions. Skilled in Python development, data processing, and integrating AI-driven solutions into business applications. Interested in machine learning engineering and building scalable AI systems that improve organizational processes.

EDUCATION

B.S. Computer Science, College of William and Mary, Williamsburg VA, 2025

SKILLS

- Programming Languages: Python, SQL, Java, C
- Development Tools: Bitbucket, Git, Visual Studio Code
- Database Management: PostgreSQL
- Python Libraries: OpenCV, scikit-learn, PyTesseract, Pandas, Matplotlib, Sentence Transformers
- Artificial Intelligence & Machine Learning: Natural Language Processing, Retrieval Augmented Generation, Generative AI, Computer Vision

---

EXPERIENCE

Business Technology Programmer, Newport News Shipbuilding
January 2026-Current, Newport News, VA

- Propose and implement AI related initiatives to improve business objectives
- Analyze, program, configure, test, and implement software applications in support of business objectives
- Coordinate with user groups to identify solutions that improve business processes

Junior Developer, DataXstream
September 2025-Current, Williamsburg, VA

- Wrote clean, efficient, and maintainable code for integrating AI services into software systems
- Developed scripts to enable seamless communication between AI/ML components and other enterprise systems
- Contributed to the documentation of software, AI, and ML workflows
- Participated in code reviews, debugging, and troubleshooting to ensure high-quality deliverables

AI & Machine Learning Intern, DataXstream
May 2025-September 2025, Williamsburg, VA

- Built and optimized Python based data pipelines for document retrieval and transformation using structured and unstructured data
- Designed a Retrieval Augmented Generation (RAG) pipeline for knowledge extraction from internal documentation
- Worked with PostgreSQL, embeddings, and vector databases to support AI chatbot capabilities
- Contributed to enhancing data ingestion and indexing workflows for improved system performance
